DownMus

This action opens Terminal with the typed command. To run a command without Terminal or to use a command's output in the workflow, use a Run Script action instead.

Note that any outputs connected to this action will receive the passed through `{query}`, and not the output from the Terminal.

```
Command: /usr/local/bin/python2.7 /Users/anthony/MEGA/DOCUMENTS/Programming/Python/MyPythonProjects/DownloadMP3Files/dmus.py
```

The command to insert into the Terminal window,

Escaping: ☐ Spaces ☐ Backquotes ☐ Double Quotes ☐ Backslashes  
☐ Brackets ☐ Semicolons ☐ Dollars

Replace {query} in your script with the passed argument, escaping as selected.
